Profile

I'm currently balancing full-time Business Management studies with a part-time role as a Helpdesk Technician at Toray Advanced Composites. In this job, I get hands-on with technical support and introduce new technologies to keep everything running smoothly and efficiently.

Alongside that, I've worked on IT projects ranging from small to medium deployments. This involves keeping track of tasks and deadlines, staying in touch with stakeholders and vendors, developing and architecting different parts, and working with team-members for final integration.

Work Experience

01/2026 – present
Morgan Hill, California, United States

Help Desk Technician
Toray Advanced Composites

Enterprise Application Management:
- Promoted to Help Desk Technician → Managed enterprise applications and environments
- Led deployment of Role Based Access Control, SSO integration, and user onboarding → Architected enterprise applications for seamless final deployment and user training

Project Execution & Training:
- Facilitated end-to-end IT project delivery → From initial conception through deployment and user training

Compliance & Certification:
- CMMC Level 2 certification → Authored compliance reports and managed system/operational changes to maintain standards and ensure compliance with standards set by the DOD.

08/2025 – 12/2025
Saratoga, California, United States

IT Internship
Toray Advanced Composites

System Upgrade & Automation:
- Led the upgrade of all company computers from Windows 10 to Windows 11.
- Learned to write scripts that sped up and automated the migration process, making it more efficient.

User Support & Communication:
- Worked directly with end-users to troubleshoot and resolve issues quickly.
- Improved my communication skills by explaining technical solutions in clear, straightforward terms.

Education

01/2025 – 12/2026

Management Information Systems, General | Bachelor of Business Administration - BBA
San José State University

- Led end-to-end IT system implementations → Collaborated with stakeholders to charter projects from conception through final deployment
- Delivered practical information system solutions → Architected and executed projects for real companies
- Adapted to diverse team roles → Contributed as Developer, System Architect, and Project Manager

Education

01/2021 – 12/2024

Business Administration and Management, General
Foothill College

Projects

07/2026 – present

Technician and System Architect
Azure Migration to Government Tenant

Worked to migrate a Commercial Azure tenant to a Government tenant.
Tasks Performed:

- Created a connection between an on-site domaine controller and Entra ID.
- Migrated on-site exchange server to have a hybrid connection with exchange online
- Made scripts to automate aspect of user onboarding such as the removal of old cached credentials
- Managed user training to ensure a smooth migration

06/2026 – 08/2026

System Architect
Docusign Migration

Worked to migrate users from Adobe sign to DocuSign. I managed the deployement from start to finish which included configuration of the web application.

- Configured SSO, user provisioning, and other setting to ensure that DocuSign integrated into the current company environment
- Made exceptions and blocks in ZScaler to block Adobe Sign and allow for certain users to upload sensitive document into DocuSign
- Handled user training and discovery to ensure all features users were using in Adobe Sign would be able to be used in Docusign.

01/2026 – 06/2026

Database Designer
Healthcare Database Design

Worked on a school project in a team to design a database for a therapy company.

Skills Learned:

- Worked to make a 3nf normalized database
- Learned how to implement schema that is scalable
